

Operating technology 'Made in Germany'

Operating technology 'Made in Germany'

The GETT headquarter in Treuen, Germany

Managing Directors Tino Pietzsch, Pierre Beer and Steve Möckel

GETT is one of the leading providers of professional operating technology that is 'Made in Germany'. As a hardware specialist, we manufacture high-quality products and solutions for industry, commerce and the medical sector.

We develop and produce both assembly groups and complete, turnkey operating solutions using our own 'InduKey' brand. We fabricate the products by hand at our own manufacturing base. As a result, we are in position to even handle minimal numbers of individual items for customers.

Quality is our top priority. No component makes its way into our stores without being checked; and no product makes its way to a customer without being tested. Our strict quality policy has ensured that we have had a reputation as a quality leader for years.

The 'Standard products' division offers one of the largest assortments of data input devices that are ready for use. Industrial and washable keyboards for any field of application are the key elements here. The range is completed by installable products like trackballs and touchpads.

The 'Customised products' division comprises the complete work package for individual operating solutions ranging from the idea to commissioning the system. We make use of all the common and innovative technologies in the field of data input. Our portfolio ranges from mechanical keyboards to complex touch panels within a frame. The 'Services' division provides all the in-house production work and services as a single service. This enables customers to gain direct access to the relevant production department. The following departments are available for customers: R&D services, extensive production services and the assembly of printed circuit boards.

2014

GETT has taken over the global production and sales rights for the renowned Canadian keyboard brand Cleankeys.

2013

The company is sold by management buyout to previous Authorized Representative Tino Pietzsch, Finance Director Pierre Beer and Purchasing Manager Steve Möckel.
